

## VR-LT

TESLA's Lipstick is a true re-issue of the original pickups made in the 1950's and 60's pickup used on Danelectro® and Silvertone® guitars!. All of our Lipsticks use Alnico magnets and a special winding technique to bring out the great tone of the past. The tone is bright and jangly, just like the original pickups!. TESLA offers matched sets for neck and bridge; these are reverse wound to create the hum cancelling effect if used as a set!

For best results, please wire your pickup in series rather than parallel this will help you re-create the original sound!

Position	D.C.Resistance	Resonant Peak	Spacing	Output Level	Tone Chart:
NECK:	4.4 kohm	10 kHz	60 mm	MID	
BRIDGE:	5.3 kohm	9.5 kHz	60 mm	MID-HIGH
